

LUGGAGE IN TRANSIT RISKS:

Globally, it is a common occurrence for luggage in transit to suffer pilferage, damages, delays and even loss. This is a clear indication that current baggage security systems are highly ineffective.

Luggage in transit is usually exposed to the following risks:

- Zipper failure.
- Cable ties and seals used on suitcases with zips are ineffective.
- Luggage and combination locks can be picked within 10 seconds.
- Access to suitcases with zips is simple and can be done without evidence of tampering.
- Baggage shrink wrapping is one of the best deterrents, however it is easily removed and replaced due to its lack of identity.

THE PROPOSED SOLUTION

Bbagzz is the ultimate luggage security solution. It minimizes the chances of luggage being tampered with whilst in transit - either by having contents removed or items inserted, while being handled.

The Bbagzz enclosure will seal the luggage entirely - including all locks and zips. Each enclosure has its own, unique identification. The traveller will carry a Bbagzz enclosure for their luggage, for each leg of their journey. Each time a Bbagzz enclosure is utilised, the respective unique identification numbers will be used to activate the warranty via sms.

The Bbagzz enclosure will be easily recognisable by effective branding and additional brand advertising. It is used once and can then be disposed of. The Bbagzz enclosure is fully recyclable.

THE BBAGZZ BENEFITS

Bbagzz will offer travelers the following benefits:

- The unique Bbagzz enclosure makes luggage more identifiable on the carousel, as the majority of suitcases are black.
- The Bbagzz product is designed to make pilferage less appealing to criminals, leaving non protected luggage as an easier target.
- Eliminates the inconvenience of having to deal with missing items (frequently only found hours later, so too late to make a claim.)
- Dramatically reduces the risk of pilferage and tampering whilst in transit - providing the insured with peace of mind.

**SIMPLY
BBAGZZ IT!**

- ANY form of tampering, whether it be removal or insertion of items, will immediately be evident when collecting luggage from the carousel. Instant reporting of tampering can then be made to airline officials, before travellers try to proceed through customs, or leave the airport.
- The Bbagzz enclosure will seal the luggage entirely, therefore also protecting it against liquid damage.
- Protects luggage and its contents against Zip failure.

THE INSURANCE COVER

The Bbagzz insurance benefit is complementary to existing travel insurance policies. The Bbagzz insurance is an additional stand alone cover, providing cover for the in transit flight period.

- Loss due to pilferage. Maximum R1000.00 per item total R5000.00 (excess R250.00)
 - Damage to luggage R1000.00
- Delayed luggage (6 hours) R1000.00
- Total loss of luggage item R5000.00 (excess R250.00)
 - Full Policy: Please see policy document

THE EASY BBAGZZ INSURANCE ACTIVATION.

- 1) Seal your luggage.
- 2) SMS The following info:

Initial. Surname. Flight No. Bbagzz No. (No will be printed on Bag)
 eg: P. Coen. HR123. J1234.
 To: +2783 142 20048 (Normal SMS rates apply)

The sms automatically records the cell number and time of SMS. You will receive a confirmation by SMS.
